#### Analysis by geographical region – Italy and USA

#### Italy

- Cement volumes clearly up compared to Q1 20, affected by the country lockdown, thanks to the stronger demand, driven by the positive dynamics of the residential renovation and public works. Ready-mix production recorded an even more marked recovery
- Favourable trend for selling prices
- 20% of consolidated Q1 net sales (17% in Q1 20)

#### USA

- Cement volumes up, despite unfavourable weather conditions in February, particularly in Texas. Ready-mix more penalized by the cold
- Average selling prices in local currency showed a slight growth
- Q1 net sales +4.3% lfl
- 38% of consolidated Q1 net sales (40% in Q1 20).

Appendix

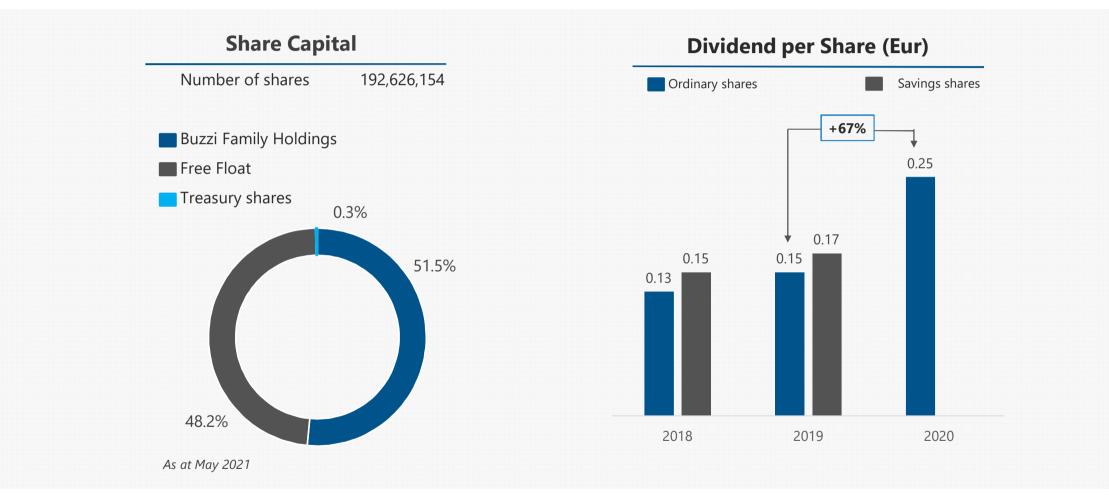

#### Buzzi Unicem at a glance

- International multi-regional, "heavy-side" group, focused on cement, ready-mix and aggregates
- Dedicated management with a long-term vision of the business
- Highly efficient, low cost producer with strong and stable cash flows
- Successful geographic diversification with leading positions in attractive markets
  - Italy (# 2 cement producer), United States (# 4 cement producer), Germany (# 2 cement producer), material joint venture assets in Mexico and Brazil
  - Significant positions in Luxembourg, The Netherlands, Poland, Czech Republic, Slovakia, Russia and Ukraine, as well as entry point in Slovenia and Algeria
- High quality and environmentally friendly assets
- Leading product and service offering
- Conservative financial profile and balanced growth strategy

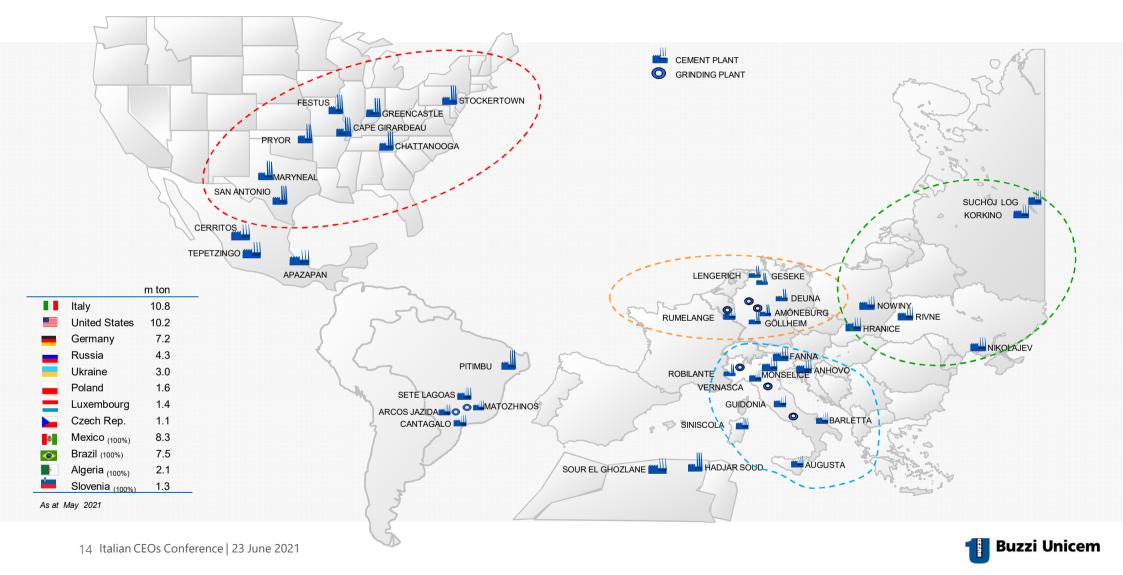

"Value creation through lasting, experienced know-how and operating efficiency"

#### Shares & Shareholders | Dividend

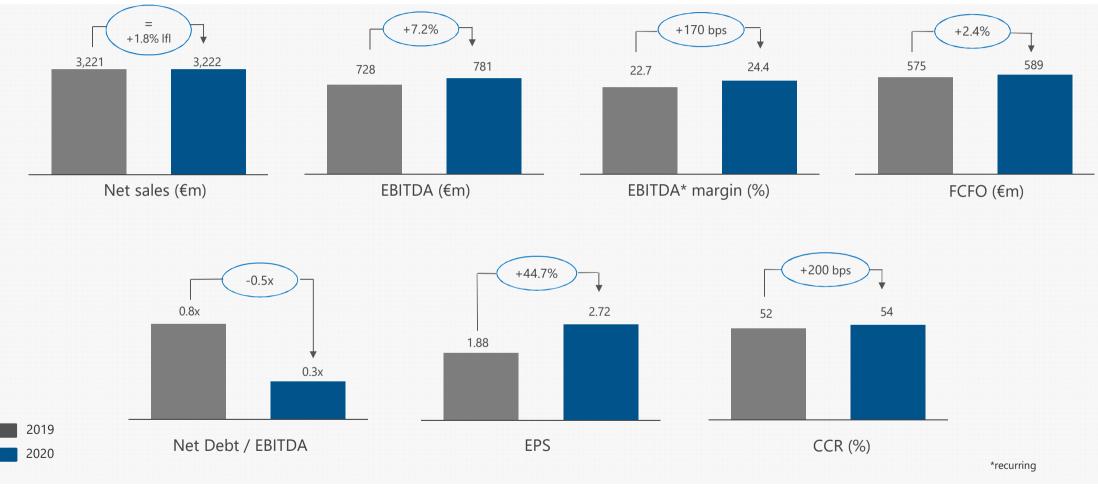

#### **Cement plants location and capacity**

### **2020 Financial Highlights**

#### **Specific Net CO<sub>2</sub> emissions: What we have achieved so far**

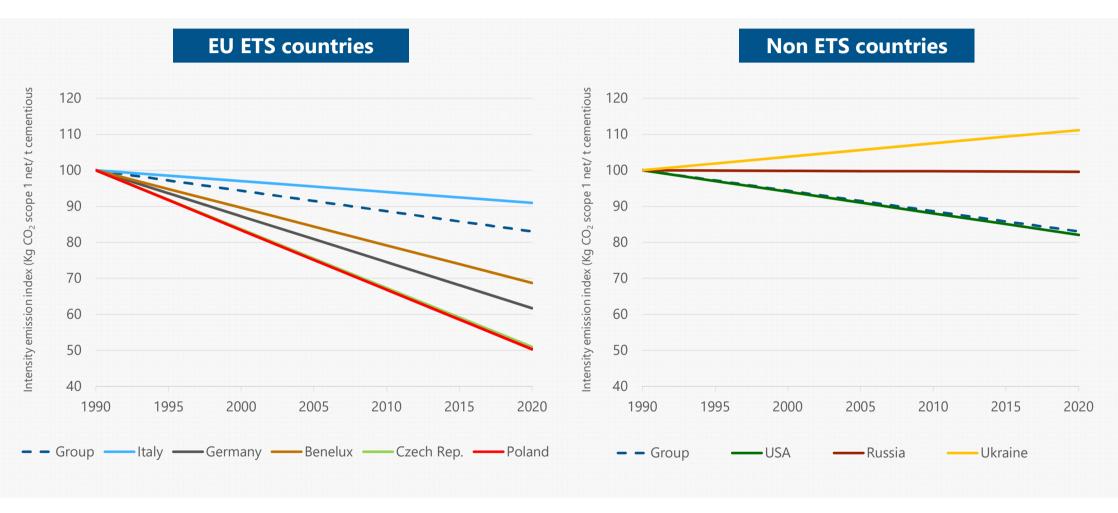

By 2020, we have reduced by approx. **17%** the specific net  $CO_2$  emissions compared to 1990 level (plants taken into consideration according to SBTI methodology)

Reduction's drivers:

- Higher alternative fuels utilization
- Thermal energy optimization
- Lower clinker to cement ratio
- Improved technologies

### CO<sub>2</sub> Intensity emission index by country: 2020 vs 1990

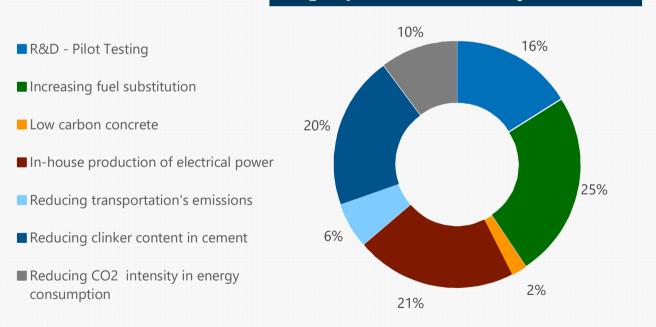

17 Italian CEOs Conference | 23 June 2021

📔 Buzzi Unicem

#### **Capex requirements for decarbonization over the next 5 years**

- Over the next 5 years, Buzzi Unicem will be involved in more than 100 initiatives aiming to reduce CO<sub>2</sub> emissions
- This plan leads to CO<sub>2</sub> specific capex per year equal to approx 10-15% of the annual avg capex spending

#### **CO<sub>2</sub> Capex breakdown by initiatives**

- Approx. 75% of CO<sub>2</sub> specific capex will be dedicated to initiatives with high short therm potential of CO<sub>2</sub> reduction, such as: increasing fuel substitution, reducing clinker content in cement, in-house production of electrical power and reducing CO<sub>2</sub> intensity in energy consumption
- Within R&D-Pilot Testing category, the most important initiative will be CCU/S
